

Startup Tech Stack Planning Worksheet – 2025

Pre Planning Questions

1. What kind of product are we building? (B2B SaaS, Marketplace, Mobile App, etc.)
2. Do we need SEO optimized frontend?
3. Will we need real time features (chat, notifications)?
4. Will we integrate third party APIs (payments, auth)?
5. Are we building for scale or MVP?
6. Do we have in house tech expertise or need a partner?

Recommended Stack Blocks

Frontend:

- React.js / Next.js / Vue 3 / Flutter Web

Backend:

- Node.js / Django / NestJS / GoLang

Database:

- PostgreSQL / MongoDB / Supabase / PlanetScale

Infra & DevOps:

- Vercel / Netlify / AWS / GCP / Docker / Kubernetes / GitHub Actions

Useful Tools to Consider

- Auth: Supabase, Clerk, Firebase Auth

- Payments: Stripe, Razorpay

- Monitoring: Sentry, LogRocket

- Caching: Redis
- Storage: AWS S3, Supabase
- CI/CD: GitHub Actions, Vercel, Netlify

Next Steps

- Book a free consult with Codenia Technologies to validate stack fit.
- Map tech choices to roadmap milestones.
- Build MVP with scalability in mind.
- Assign ownership to DevOps/infra from Day 1
